Introduction

Hi! This is Shane Werner, the author of this report. Before getting started, I wanted to provide a quick introduction about myself and the methods in this report. I have been marketing online since last 3 years, but its only since last year that I seriously started getting involved in making money online. I used to work as a Team Leader for a huge multi-national company. I earned OK, but was never enough to fulfill my desires. An urge to create an extra income, pushed me in to Internet Marketing as a full timer.

Initially, I tried to earn some extra cash writing articles, but soon realized that it was simply not worth the time. So, I started exploring other options. I had to go through a lot of junk and spend a lot of money to find a handful of methods that really worked and did not require much of capital. This report documents those methods without fluff.

Why Sell Amazon Products...?

Amazon only pays around 4% to 8% of your sales proceedings depending on an affiliate's performance. But, there billions of people who buy from Amazon and we can easily cash-in on this factor. If you can sell one \$100 Clickbank product in 30 days, you can easily sell hundreds of Amazon products in one month, provided you use the right strategies.

What you will not learn in this report...

You will not learn about how to create an Amazon affiliate account or how to create an affiliate URL unless it is required for a specific method. The purpose of this report is to provide information in a straight forward, clear cut manner without getting in to frivolous details.

Now, let us get started without further delays...

Method 1 - Amazon Craigslist Loophole

Summary

We are going to use Craigslist to promote used products from Amazon. The reason we pick used products is that Craigslist is a great place to find thousands of targeted buyers looking to buy used goods. You will rarely find people going to Craigslist to find a New product. This is one of the easiest methods to follow, but needs to be followed exactly as outlaid for easy success.

Before we start, I will assume that you already have an Amazon Associates account and a craigslist account. If you don't have these accounts, you must register for them now. If you are not sure how to register, please Google it out and you will find loads of information.

The Method

This is a 4 step method.

Step 1: Choose your product

We are going to pick a used product to sell on Craigslist. Head on to Amazon.com and search for used products that people would love to buy. Try and pick products where Sellers offer free shipping. Used products in the following categories sell really well:

- Mobile Phones
- Popular Electronics
- Home Appliances
- Power tools

Here's some more criteria to pick the perfect used product:

- The sale price must be at least \$100
- Should be a popular brand
- Should have good customer reviews

Easy Amazon Cash - 3 Amazing Cash Methods. Make \$100 Per Day!

- Should have multiple Sellers selling the product

Step 2: Create an affiliate URL

As an example, I've selected the product Apple iPhone 4 16GB (Black) and here's the link to the detail page of this product:

<http://www.amazon.com/exec/obidos/ASIN/B004ZLV5UE/AssociatesID-20>

When you pick your product, you can replace **B004ZLV5UE** with the code for your product. This code is called the ASIN: Amazon standard Identification Number and is found on the product detail page of every product. Here's another pick:

B0082PT89E. The URL will be:

<http://www.amazon.com/exec/obidos/ASIN/B0082PT89E/AssociatesID-20>

Step 3: Post a Craigslist Ad

Head on to Craigslist and post an ad for the product you just picked. The ad needs to be simple and to the point. You can use the condition note provided by the Seller on Amazon in your ad. In any circumstances **DO NOT** include your affiliate URL in your post or your craigslist account will be banned. You just have to provide your e-mail address so that the prospective buyers can contact you.

Here's an example of a decent ad for ASIN B004ZLV5UE:

"Title: Apple iPhone 4 16GB (Black) for sale in great condition

Body:

The phone has been inspected by a well experienced technician and is guaranteed 100% functional and in good condition with minor signs of use. It comes in a generic white box with aftermarket accessories (headset, USB cable and charger).

Selling for \$179.95 to get a quick deal. Will ship it for free anywhere in the US."

Only serious buyers need to contact.

Step 4: Replying to inquiries

Use this e-mail template to reply to your inquiries:

Hi {First Name},

Thanks for your interest in buying my iPhone 4S.

*As noted in my ad, I would like to get a quick deal, but I also need a safe transaction for both you and me. So, I've listed the product on Amazon. Just go to this [link](#) and visit the Used offers section. There you can find an offer from **Seller: NuTwo**, and that's me!*

As you can see, I am shipping the product for free and I can ship anywhere in the US. Also, as per Amazon's terms, I will honor the 30 day return policy. This is a safe deal for both. Also, I can get the money safely deposited in my bank account directly - a win-win for both of us. :)

Hope you will buy the phone before someone else does!

Cheers,

{Your Name}

Frequently asked question about this method:

1. What if the person buys from another Seller or another product after I e-mail him? Will I lose the sale?

A. No. You will not lose your affiliate sale. That is the beauty of this system. Once you e-mail the affiliate link, it does not matter if that person buys from your recommended seller or another seller or a whole different product. You will still get the referral commission. :)

Method 2 - Amazon Cash Siphons

Summary

We will use Facebook fan pages that will act as siphons for selling Amazon products. The method is one of the easiest Amazon cash methods and most internet Marketers tend to ignore this method.

The Method

This is a 4 step method.

Step 1: Choose your niche

The technique used to choose a niche for this method is slightly different. In this method, we will use [Google Trends](#) to check out the popular trending topics. I quickly checked out the trends for today and found that **Golden State Warriors** had over 100,000 searches and they were in news. So, this can be an ideal topic to create a quick fanpage on. Another reason this is good is that **Golden State Warriors** is a basketball team and they will probably be there for a long time and it is possible that they will trend again and again on Google searches. Similarly, celebrities are a good idea. One example would be Bear Grylls fan page. If you create a Bear Grylls fan page, you will have a tremendous opportunity to market all Gerber brand products. People who are passionate about adventure love him and they will buy any product that he recommends.

Just remember 2 things while selecting your fan page topic:

- a. Should be something that is trending now and will be trending for considerable time in future
- b. Should be something that can be monetized

Step 2: Create a fan page

I will not teach you how to create a fan page because there is a lot of free information available on the Internet and its extremely easy to create one. So, create a fan page on the chosen topic/niche.

Easy Amazon Cash - 3 Amazing Cash Methods. Make \$100 Per Day!

After creating your fanpage, keep posting short and interesting stuff that will keep your fans engaged.

Step 3: Promote your fan page

There are quite a few things you can do to promote your fan page.

- a. Post it as a status message on your own Facebook page and ask your friends to share it and like it
- b. Search for Facebook groups relevant to your fanpage and join them. Once you join these groups try and recommend your fanpage in a subtle way
- c. If you can spend \$5, you can order a Fiverr gig to receive hundreds of Facebook likes in a few days. However, please make sure, you buy it from a Seller who is rated high. Now, these people will not necessarily buy products from your fan page and probably are fake Facebook users, but it makes your fanpage appear more serious and other genuine people will start liking it. This technique gives you an unfair advantage to get a lot of genuine Facebook users join you.

Step 4: Start Monetizing

Once you have got about 500 genuine Facebook likes, you can start monetizing it. You can post small status updates as below:

Example 1: Up to 50% discount on all items of Golden State Warriors Fan Shop: [Provide URL]

I am assuming that you already know how to convert an Amazon search page link in to an affiliate page. If you are not aware of this, do a quick search on Google and you will get to know in 30 seconds.

Example 2: Bear Grylls recommended, Ultimate Survival Pro Knife, now available on Amazon: [Provide URL].

In the above example, we are acting as if we are simply passing on the information. It's important not to try too hard to sell.

Easy Amazon Cash - 3 Amazing Cash Methods. Make \$100 Per Day!

Once you get the hang of this method and start making money, I would recommend that you immediately start outsourcing this system. You can easily outsource this to someone in Philippines and start earning \$100 per day. The more fan pages you have, the more money you make.

Method 3 - The TwitaZon Method

Summary

You will use twitter to promote Amazon products. You will take products from Amazon's RSS feed and set them up to be tweeted on multiple twitter accounts. Unlike other methods, this method does not involve product selection. In fact, you don't even have to bother about which products to sell. Once the system is setup, your Amazon products are going to be sold automatically. There is absolutely no need of marketing or writing product reviews. This method can have the money rolling in your Amazon Associates account within 1 to 10 days of implementation.

The Method

This method is slightly longer method that involves 6 steps.

Step 1: Create a twitter account

Create a twitter account with a genuine looking first and last name, with an image of an actual person. The image can be downloaded from one of the stock image sites. Just do a quick search on Google for "*free stock pictures*," and you will see numerous websites that offer free images.

Step 2: Create a Twitter Feed account

Register for an account at <http://TwitterFeed.com/> This website is used to setting up your RSS feeds. Once you setup your RSS feed in Twitter Feed, all products that Amazon adds to the RSS feed will be tweeted through your Twitter account. We will talk about setting up your RSS feed in the next step.

Step 3: Create an Amazon RSS feed URL

While I detail this step, I assume you already have an Amazon's Associates account. If not, please do register for one and have your Amazon Associates ID handy. It should look something like *spiderman-20*

Easy Amazon Cash - 3 Amazing Cash Methods. Make \$100 Per Day!

Now, edit this URL: <http://shopsloop.com/rssa={YourAssociatesID-20}> with your own associates id.

Make sure you remove the **{YourAssociatesID-20}** part and append your associates id to the above URL.

You have now created an RSS feed with your own Associates id. If you are wondering what Shopsloop.com is, they are a website that provides a free and easy way to create Amazon RSS feeds. When you use this RSS feed, your associates id is infrequently replaced by Shopsloop's own associate id and that is how they earn revenue. This is a win-win situation for both Shopsloop and you.

Step 4: Linking your Amazon RSS Feed

You will use TwitterFeed.com to link your Amazon RSS feed (that you just created) to your Twitter account. Once you login to your TwitterFeed.com account, you will see a **Create New Feed** button:

Click the **Create New Feed** button and you will get the form as below:

New Feed

Step 1: Create Feed Step 2: Configure Publishing Services Step 3: Done

Step 1: Name Feed & Add Source URL

As you can see above, your ShopsLoop URL is your RSS URL and feed name can be anything to identify your feed. You can keep the rest of the setting same as the above screenshot. Now click on the Continue to Step 2 button:

Continue to Step 2

- You should be on the Available Services page. Select Twitter.
- On the next step, you will click on the large button as shown in the below screenshot:

Once you click on that button, you will be taken to twitter to authorize the app. Basically, TwitterFeed is taking authorization from your twitter account to tweet products from Amazon RSS feed on to Twitter.

Once you have authorized the app, you will return to TwitterFeed.com. That is the end of this step.

Step 5: Increase your RSS Feeds

TwitterFeed.com allows you to insert as many as 5 RSS feeds per twitter account. So, take advantage and create 4 more RSS feeds and add them up.

Here's how to create multiple RSS Feeds:

Simply replace rssa01 in the URL <http://shopsloop.com/rssa01=hello> with **rssa02**, **rssa03** and so on...

So, your RSS URLs will look something like:

<http://shopsloop.com/rssa02=hello-20>

<http://shopsloop.com/rssa03=hello-20>

<http://shopsloop.com/rssa04=hello-20>

<http://shopsloop.com/rssa05=hello-20>

Step 6: Create an Avalanche

After maximizing the number of RSS feeds to your twitter account, it's time to maximize the number of twitter accounts. Good news is that TwitterFeed.com allows you to add unlimited number of twitter accounts. Now, all you have to do is create 10 twitter accounts per day and follow **Step 3, Step 4 and Step 5** for each twitter account. If you are still wondering how you will make money with this method, here's an explanation for you.

- Tweets easily get indexed on Google
- Numerous websites use Twitter feeds to receive automatic content
- Tweets easily get viral through Re-tweets and Facebook likes

You will get a lot of organic as well as social traffic that will make you money. You can potentially start getting sales from the first day onwards.

Few Important Tips

- The more number of accounts you have, the more money you will make. So, try and create as many accounts as possible. However, make sure you do not create multiple twitter accounts in quick succession. Give a gap of 30 minutes for each twitter account creation.
- Social bookmark your twitter profiles to improve exposure
- Occasionally, try and tweet some real stuff so that your account does not come across as a spam account by twitter staff. You can use an online application called [Social Oomph](#) that allows you to schedule tweets.
- If you have a budget, you can buy pre-created phone verified twitter accounts from various sources on the Internet. There are quite a few people who sell packages of 100 to 1000 twitter accounts with genuine looking names and images. Before you buy, please make sure you do some research on the individual who is selling these accounts. Usually, if you do a

Easy Amazon Cash - 3 Amazing Cash Methods. Make \$100 Per Day!

quick search, you will come across reviews of such services. So, go for the ones that have good reviews.

- If you decide to outsource the TwitterFeed job, make sure you either outsource it to someone in India or Philippines. People from developed countries will charge you a lot of money and people from under developed (or developing) countries may not do the job well. From my experience, I once outsourced this job to someone in Bangladesh and all my twitter accounts got banned. However, the person from Philippines was able to do the job well without having a single account banned. This is my personal experience and may not be typical, but prevention is always better than cure.
- When you start receiving your Amazon checks, don't quit the system. Although this is a set and forget system, its important to keep adding twitter account and increase your sales if you want consistent profits.

This method made me a lot of money and I bought a lot of expensive watches on Amazon using my gift certificate balance. I prefer to get a GC from Amazon because I buy all kinds of stuff directly from Amazon. It is up to you, if you want to make this a stock method for making money or simply as an extra income. Like any other method, the amount of money you make will depends solely on your efforts.

I hope you are excited and will get started today!

Conclusion

I hope you enjoyed reading this report. I hope you got an idea how powerful these methods are. However, believing and doing are two different things. You will not realize the true potential unless you actually use these methods. I recommend that you put these methods to action starting today and don't allow this report to collect dust on your hard drive. I really hope you will put this to use and are able to make some good money with this information.
