

Rank to the FIRST PAGE on Youtube within 1-3 days and Increase your Traffic and Leads

Terms and Agreement

Please be advised that I will not accept refunds after you purchase these methods.

You must also be aware that you are not allowed to leak or resell this ebook.

THIS EBOOK HAS 3 PARTS

Part 1 - How to rank your new video to page 1.

Part 2 - Increase your traffic and leads using an amazing Youtube Tool.

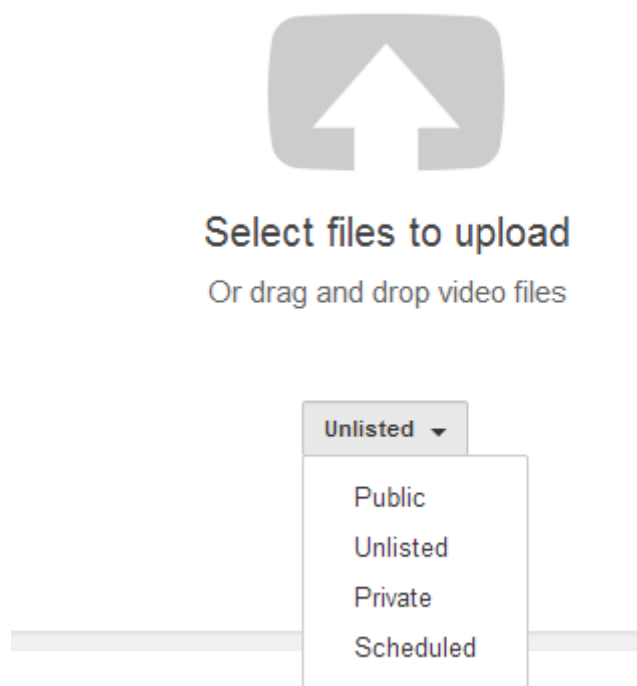

Part 3 – Monetize your video and make money. Guide to make easy videos using PLR articles.

Part 1 - How to rank your new video to page 1.

Some people are struggling to rank their video but we've managed to crack the code to do this in short period of time. We are showing you 2 methods that will rank your video to the first page within only 1-3 days.

Method 1:

Before you upload your video, a box will be there. You will see the choices of PUBLIC, UNLISTED, PRIVATE and SCHEDULED. (see the image below)

Now choose on the UNLISTED option. You may, or may not know this already, but I will explain to you exactly how it's done to stay on first page longer and how I did it to rank my video with 5 million searches on Google Keyword Tool. While uploading place your main keywords in the title. For the description, see method 2 first.

Method 2: Rank your new video to page one on low competition niches without any views.

Go to the last line of your description and type in the title that you used on your video. Type in the exact title you used. Press enter to go to the next line and copy your Youtube video's link in this format: <https://www.youtube.com/watch?v=ID> For the top part of your description, you can include anything relevant to your video. It will not affect this ranking method. For the tags, make sure you include your main keywords and add relevant keywords that relate to your video. Do not use keywords that are not related to your video.

You should have a description that looks like this:

Top part of description (Insert some keywords)

(Insert Title Here)

(Insert Youtube Video Link here)

The reason for including your Youtube video's link there is to gain backlinks from people who automatically scrape your Youtube video onto their sites. This method will rank your video for low competition niches to first page without needing to unlist your video or send views. You have to wait a few minutes so that your video will appear on the 1st page. This may seem very simple but it does the trick to rank your videos to page 1 on low competition keywords. If it does not rank, the competition is not low enough. The best way is to combine both of these methods which will be more effective.

Method 1 (Continued)

Now that you have read the second method, we will apply both of these methods together. After setting your video to unlisted, and applying method 2, we need some views.

- 1. You need to send more than 301 views to your video.
- 2. You can share to your friends, or use a method that will help you get at least 301+ views. This is a free way to get views. The higher the retention (high watch time) of your views, the better your video will rank.
- 3. The way that was used to rank the high competition video on my sales page was by using a Youtube Views provider. Search for a good high retention Youtube views provider. Make sure they are providing high retention real views.

Before I used my provider, I contacted them to check if their views were real.

The Youtube provider that I used is qqtube.com - I am not advertising this service, this is just what I used. You are free to use any Youtube views service. They sell high retention views at \$0.60 per 1k views. You only need 1k views to do this method.

Sign up for an account and click on the Youtube Views section.

You should see this:

Low Risk

High Risk

Submission Information

1000

Total Cost

0.60

Select any options you would like (not required):

☒ Retention

Make sure to click the “retention box” for high retention views.

After submitting your video for 1000 retention views, wait around 8 to 12+ hours for your video to start receiving views.

Once your video has around 800 views, go to your video manager and edit your video. Set your video from unlisted to public.

Wait a few minutes and check your keyword in the Youtube search.

Your video is now on Page 1 for your keyword!

If it is not on first page, you either missed some steps, or your keyword's competition is way too high.

How to stay on the first page:

The amount of days your video will stay on first page will depend on your competition and niche. There are also people who may outrank your video. If the people who watch your video watch it for longer time, it will have a high audience retention which will help your video stay on first page longer.

The key to having your video stay on the first page is to have a high quality video. Include elements that will interest your viewers and catch their attention. This will help you receive a higher retention for your videos. Also, make sure you use only Whitehat niches.

Sometimes, in a high competition niche, your video may get flagged by competitors on purpose to get your video removed. This is why you use whitehat niches to make sure your video does not get removed. If it gets flagged and removed because of competitors, you still have a chance to appeal the decision. In part 2, I will explain to you how to use external annotations in your video that can link to your website without needing to use the description. This could decrease the rate of your video being removed by flaggers because your competitors do not see a link in the description and Youtube may not agree with their flags.

Part 2: Increase your traffic and leads using this amazing Youtube tool that you may not be aware of and stay on first page longer.

I know you guys always include the term “See the link in the description below, or Click the link on the description below” on your videos.

Now I’ve managed to find out a new way to get people to click your links without using the description. It is called External Annotations.

What do External Annotations do?

It will let you link to your website using annotations.

People will be able to click on your link while watching your video, or at the end of the video. They will not need to click on the description.

Here's a good video tutorial on how you External Annotations work and how to set up. <https://www.youtube.com/watch?v=eytE4BU9Atk>

By using external annotations, it could help protect your video from flaggers because they do not see a link in your description.

Part 3 is on the next page.

Part 3: Make \$100+/Day with AdSense Easy (Copy & Paste Method)

The method is called copy & paste because you'll just copy PLR articles and paste it onto your video.

Follow these steps:

Step 1: Find articles that has top 10, top 50 or anything that has compilation of awesome things. For example, (Example only, not PLR)

<http://www.chicagonow.com/get-fit-chicago/2014/02/10-healthy-foods-that-relieve-constipation-and-help-you-poop/>

Step2: Copy the article and get relevant pictures.

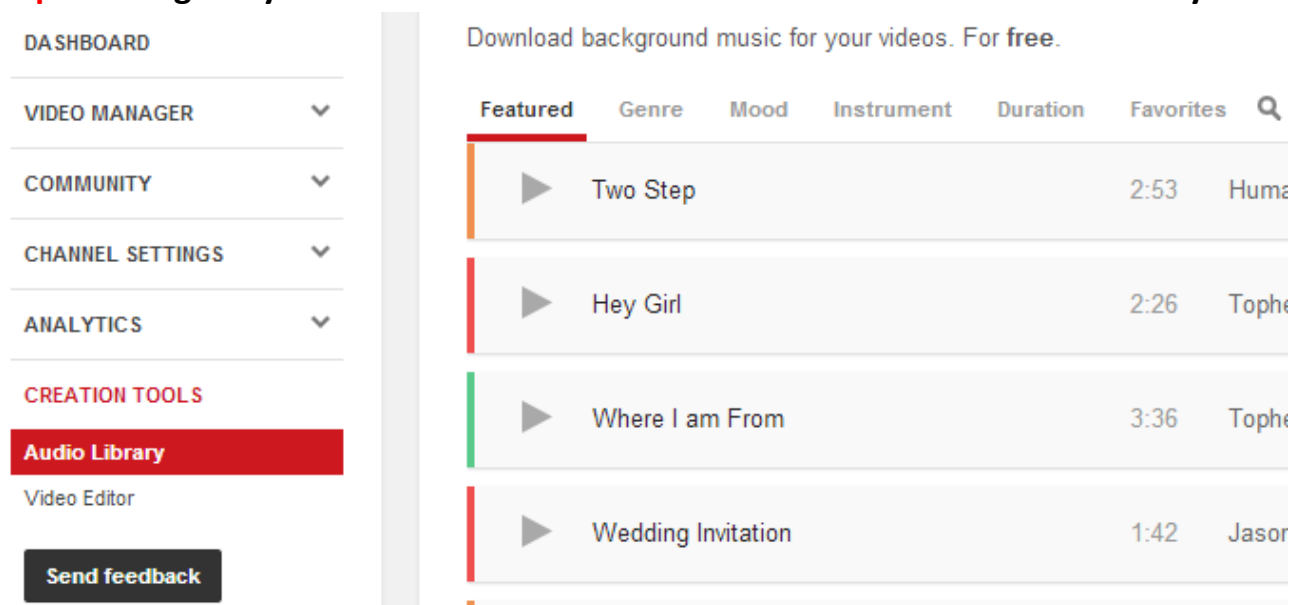

Please see the sample to see what your video would look like - Sample:

<https://www.youtube.com/watch?v=YWK7Lpfl-oY>

Step3: Now open up your video creation tool such as movie maker, camtasia and etc. I use camtasia for creating videos.

Step4: Paste the articles and pictures that you've copied a while ago.

Step5: Now go to your Youtube channel and click creation tools > Audio Library

Choose the music that you like and add it to your video creation tool.

Step 6: Once you're done with your top 10 video and have successfully ranked it, upload it and set the Monetization on. If you don't know how to set the Monetization on your videos and channels go to this site for tutorial.

https://www.youtube.com/account_monetization

Here's the sample again: <https://www.youtube.com/watch?v=YWK7Lpfl-oY>

Here's a big channel that is making a lot of money.

Final Remarks:

Now that you know how to rank your videos to the first page within only 1-3 days, allow people to click links on your video using External Annotations and given you a method to build your own niche. It's up to you on how much money you can make out of these great methods.

Thank you, and good luck!
